STAFF HYGIENE

ULTRASHOWER PINK

ULTRASHOWER PINK is a pearly pink, viscous, perfumed hand and body gel containing skin conditioners, Tea Tree Oil and Aloe Vera extract. The product gives a strong, long lasting lather and after rinsing off the skin has a clean fresh feel. ULTRASHOWER PINK is a synthetic liquid soap, giving maximum cleaning in both hard and soft water.

HANDSAN (HAND WASH) SABS 1828:2017

Available in 5 L and 25 L containers RTU

HANDSAN is a liquid, non-perfumed hand soap, formulated for the food industry. The quaternary ammonium compounds used in HANDSAN are effective against *Staphylococcus aureus*, *E.coli* and *Pseudomonas aeruginosa*. HANDSAN has a neutral pH, is effective in both soft and hard water and can be applied through a soap dispenser.

T.H.S. (ALCOHOL SANITISER) SABS 490:2013

Available in 5 L and 25 L containers RTU

THS is a blend of wetting agents, disinfectants and moisturisers formulated with an alcohol based liquid hand gel. The product contains no dyes or perfumes, making it safe for the food industry. THS breaks down biofilms, is active against a wide range of microorganisms, forms a bacteriostatic film on the skin, is non-irritating and is stable in the presence of organic matter.

MILKING PARLOUR AND SURROUNDINGS

STABISAN VC SABS 1853 NRCS/8054245082/437

High active product, can be foamed at up to dilutions of 1:200.

STABISAN VC is a highly concentrated disinfectant based on a synergistic blend of amphoteric and quaternary ammonium compounds, which have broad-spectrum anti-bacterial and anti-viral activities. STABISAN VC is a general disinfectant designed to be applied on surfaces (generally clean and in good repair) with the aim to supplement other efforts at improving hygiene conditions. It is ideal for use as a terminal disinfectant for biosecurity in intensive farming and industrial operations, especially in spray races. When used at the recommended dilution levels, it is safe in the environment. STABISAN VC can be applied via high-pressure washer, foamers, mops or ULV fogging equipment. The mechanism of bacterial action of STABISAN VC is closely related to the surface activity of the active quaternary ammonium compound. The interaction of the bacterial agents with the cell wall interferes with the metabolic process of the microorganism and this causes the inhibiting or killing action.

Effective in hard water conditions.

Suitable for all equipment.

Non-corrosive, non-staining.

OPTIMAX (FLOORS) SABS 1828:2017

OPTIMAX is an alkaline, high foaming, liquid detergent containing solvents, grease cutters, emulsifiers and penetrants for efficient oil and protein removal. It can be diluted with water for lowest usage costs and efficiency. OPTIMAX being an extremely versatile product, can be used safely on most surfaces for removing a wide variety of soils.

OUTBREAK CONTROL NRCS/8054245082/51

Available in 5 L and 25 L containers, dilute 1:100

Outbreak control is a concentrated blend of quaternary ammonium compounds, glutaraldehyde, alcohols and surfactants. It can be used in footbaths, spray races, wheel dips and all surfaces. It is active against viruses, Gram positive and negative bacteria, fungi and spores. Outbreak control is effective in hard water, non-corrosive, biodegradable and has a neutral pH.

VIROGUARD (FOOT DIPS) NRCS/8054245082/59

Available in 5kg buckets, dilute 1:100

Viroguard is a blend of organic acids surfactants and biocides. It is a powder that is effective against many different strains of Bacteria, fungi, viruses and spores. It is readily dissolved in tepid water and is extremely stable in solution - tests show a 1% solution of Viroguard retained 90% efficacy after 7 days. It is ideal for foot dips, cleaning and disinfecting equipment and calf feeding buckets and water sanitation (dilute 1:1000). It is also bio-degradable.

ANIMAL CARE

TEAT WASH

Pre-milking wash:

A gentle hygienic cleanser for udder and teat with chlorhexidine.

TEAT DIPS

Available in 5 L and 25 L containers, RTU or dilute 1:4

RED HEX ND is a thick red, chlorhexidine gel-based teat dip RTU.

HEX RTU is a chlorhexidine based spray-on teat dip.

UD WINTER is a gluteraldehyde based spray-on teat dip, diluted 1:4.

All our teat dips are proven microbiologically to kill all known mastitis causing pathogens. They contain eucalyptus oil to repel flies and enhanced emollients to prevent skin from drying out and chapping on the teats.

MILKING EQUIPMENT HYGIENE

BIC ACID PLUS SABS 1828:2017

Available in 5L and 25L containers, dilute 1:100

BIC-ACIDPLUS is a solution of strong acids formulated for removing and controlling milkstone in dairies. It is concentrated and economical to use. When used on a regular basis, it will prevent the build up of milkstone. BIC acidplus is economical to use, safe on stainless steel and non-foaming. CIP cleaning - Use 510 mls per litre water at up to 60c For heavily contaminated areas a higher concentration may be required. SOAK TANK cleaning - Use from 5mls per litre up to the concentrate dependant on the degree of soiling.

KLOR M SABS 1828:2017

Available in 5L and 25L containers, dilute 1:100.

It's a concentrated, chlorinated, liquid, alkaline cleaner. Low foaming so its suitable for CIP pipes, tanks and hard surfaces. Chlorine breaks the protein link between fatty soils and mineral deposits, while protein is denatured by the caustic alkali. It neutralizes offending odours caused by bacteria, is fast acting, cleans and sanitizes in one operation and is effective in hard and soft water.

MILKING EQUIPMENT HYGIENE

IODINE ALA NRCS/8054/245082/58

Available in 5L and 25L containers, dilute 1.5:1000 (0.15%)

Iodine ALA is a concentrated water soluble composition of acid and an iodine-synthetic detergent complex. It has efficient detergent-germicidal and sanitizing properties which diminish the micro-organism count of a treated area in one operation. Iodine ALA can be used on hard, non-porous, inanimate surfaces such as walls, floors, appliances, furnishings, utensils and equipment. Iodine ALA is ideal for soaking equipment, back flushing and hand dipping in the dairy industry.

BACTERIA FLUSH

Available in 5L and 25L containers, dilute 1:600

Bacteria flush is a broad spectrum biocide, effectively eliminating bacteria, viruses, yeast and moulds. It is effective at low concentrations and ambient temperatures. Bacteria flush is environmentally friendly, biodegradable and miscible in hard or soft water. It is ideal for rinsing the milk cups in between cows.

TRIHIDRO SABS 1853:2020 / NRCS/8054/245082/62

Available in 5L and 25L containers RTU.

Trihidro is a powerful, non-corrosive oxidizer for use in drains, grease traps, sewerage lines, lift stations, and surgical drains. It manages the food safety risk of Listeria and flies by providing a high level of drain sanitation. It eliminates organic odors, devours hydrocarbons such as greases, oils and fats; devours bodily fluids and substances such as blood, cellulite, tissue, hair, skin and urine; increases Dissolved Oxygen, which boosts biological metabolic activity downstream at the wastewater treatment plant/sludge dam; scavenges poisonous hydrogen sulfide, preventing it from corroding metal surfaces and is biodegradable and non-flammable.

PENLUBE

Available in 5L and 25L containers, RTU

This is a penetrating lubricant which penetrates electrical points, making them water proof during washing and sanitizing processes. Penlube frees stuck parts, protects against rust and corrosion, displaces moisture, is safe on metal, paint and rubber, is silicone-free and cleans rust, tar, grease and adhesives.

MILK TANK HYGIENE

KLOR M SABS 1828:2017

Available in 5L and 25L containers, dilute 1:100.

It's a concentrated, chlorinated, liquid, alkaline cleaner. Low foaming so its suitable for CIP pipes, tanks and hard surfaces. Chlorine breaks the protein link between fatty soils and mineral deposits, while protein is denatured by the caustic alkali. It neutralizes offending odours caused by bacteria, is fast acting, cleans and sanitizes in one operation and is effective in hard and soft water.

BIC ACID PLUS SABS 1828:2017

Available in 5L and 25L containers, dilute 1:100

BIC-ACIDPLUS is a solution of strong acids formulated for removing and controlling milkstone in dairies. It is concentrated and economical to use. When used on a regular basis, it will prevent the build up of milkstone. BIC acidplus is economical to use, safe on stainless steel and non-foaming. CIP cleaning - Use 510 mls per litre water at up to 60c For heavily contaminated areas a higher concentration may be required. SOAK TANK cleaning - Use from 5mls per litre up to the concentrate dependant on the degree of soiling.

TRIHIDRO SABS 1853:2020 / NRCS/8054/245082/62

Available in 5L and 25L containers RTU.

Trihidro is a powerful, non-corrosive oxidizer for use in drains, grease traps, sewerage lines, lift stations, and surgical drains. It manages the food safety risk of Listeria and flies by providing a high level of drain sanitation. It eliminates organic odors, devours hydrocarbons such as greases, oils and fats; devours bodily fluids and substances such as blood, cellulite, tissue, hair, skin and urine; increases Dissolved Oxygen, which boosts biological metabolic activity downstream at the wastewater treatment plant/sludge dam; scavenges poisonous hydrogen sulfide, preventing it from corroding metal surfaces and is biodegradable and non-flammable.

WASTE MANAGEMENT

BOHLISA

Available in 1kg and 5kg buckets, dilutes with equal parts of water : powder.

Bohlisa is a non-hazardous, multi purpose digester. Bacteria break down organic matter found in drains, sludge dams, septic tanks, grease traps ect. These bacteria favour aerobic conditions to grow in.

M-BAC SABS 1828:2017

Available in 5L and 25L containers RTU

M-BAC is a combination of "live" bacteria and enzymes that penetrate and digest fats, greases, cellulose, protein and carbohydrates rapidly. Deodorizes floors and walls, controls odours thus reducing fly problems. Suitable for spraying onto rubbish dumps, manure heaps and other areas where waste disposal and odour problems occur. Can be used in septic tanks to provide the necessary digestion to eliminate carry-over. It can also be used as a laundry pre-spotter on stains.

QC CHECKS

TEST STRIPS

We have a range of test strips for quick, easy identification of the following:

- pH
- gluteraldehyde
- peroxide
- chlorine

VEHICLES

AUTOSHINE

Available in 5L and 25L containers, dilute 1:100

The high oil and grease removal properties of autoshine make it particularly suitable for cleaning vans, delivery vehicles and motor cars. The cleaning can be done by hand, h.p. washer, or through automatic car washing plants. When thoroughly rinsed, very little or no drying is required. It is quite safe on all painted surfaces. Autoshine can be used to clean vehicle interior surfaces.

WASH AND WAX

Use at 5mls per liter water. Warm or cold water can be used.

WASH AND WAX is especially suited to washing vehicle exterior by pressure washer or manually and leaves no residue or streaks on the vehicle exterior even when allowed to drip dry. WASH & WAX is neutral and soft on the hands. The high oil and grease removal properties of WASH & WAX make it particularly suitable for cleaning vans, delivery vehicles and motor cars. The cleaning can be done by hand, H.P. washer, or through automatic car washing plants. When thoroughly rinsed, very little or no drying is required. It is safe on all painted surfaces. WASH & WAX can be used to clean vehicle interior surfaces.

LAUNDRY AND KITCHEN CARE:

MICRO SAN

Available in 5kg and 25kg containers. Use 40 – 80g per 5kg load

Microsan is an industrial concentrated powdered laundry clothing detergent, comprising inorganic builders that have fabric care properties, surfactants, sequestering and brightening agents. It can be used in both top and front loading machines and washing by hand.

BETTER (DISH WASH)

BETTER is a liquid general purpose detergent having a scientific blend of anionic and non-ionic constituents designed to penetrate and lift a wide variety of soils. Better also contains hard water conditioning agents to ensure maximum cleaning even in hard water. BETTER is safe on all metals, painted surfaces, plastics, rubber and glazed surfaces, and can be applied in dishwashing, all hard surface cleaning, e.g. walls, and floors, etc.

U29 (GENERAL PURPOSE CLEANER) SABS 1828:2017

U-29 is an alkaline fluorescent yellow foaming liquid containing solvents, grease cutters, emulsifiers and penetrants for efficient oil and grease removal. It can be mixed with water at a dilution of 1:100 for lowest usage costs and efficiency. U-29, being an extremely versatile product, can be used safely on most surfaces for removing a wide variety of soils such as:

- Greasy floors and surfaces in food processing plants, specifically acid resistant tiles.
- Kitchens for cleaning stoves, tiles, working surfaces, sinks, etc.

U-29 can be applied by high pressure foamers and steam cleaning equipment, or simply by hand with the aid of a cloth, mop or brush.

STABISAN VC SABS 1853 NRCS/8054245082/437

High active product, can be foamed at up to dilutions of 1:200.

STABISAN VC is a highly concentrated disinfectant based on a synergistic blend of amphoteric and quaternary ammonium compounds, which have broad-spectrum anti-bacterial and anti-viral activities. STABISAN VC is a general disinfectant designed to be applied on surfaces (generally clean and in good repair) with the aim to supplement other efforts at improving hygiene conditions. It is ideal for use as a terminal disinfectant for biosecurity in intensive farming and industrial operations, especially in spray races. When used at the recommended dilution levels, it is safe in the environment. STABISAN VC can be applied via high-pressure washer, foamers, mops or ULV fogging equipment. The mechanism of bacterial action of STABISAN VC is closely related to the surface activity of the active quaternary ammonium compound. The interaction of the bacterial agents with the cell wall interferes with the metabolic process of the microorganism and this causes the inhibiting or killing action.

Effective in hard water conditions.

Suitable for all equipment.

Non-corrosive, non-staining.
